Sublime Text 3 Sublime Text is probably one of the most famous text editors available for Mac and for all the right reasons.. Open Files from OneDrive In any of these applications, when you want to open a file (File > Open, or command-O) the application will present you with a number of options: • OneDrive – Northeastern University • SharePoint – Northeastern University (this is the Northeastern instance and is not connected to Office 365 – ITS does not recommend attempting to use this) • On my Mac If you select OneDrive, you will be taken through the files and folders you currently have stored on OneDrive for Business in the cloud.

TextWrangler is BBEdit's 'little brother,' based around the same core text editing technology and designed for anyone that needs a text editing and transformation tool.. After you save the file in RTF, reopen the file in Word for Mac, and then convert it from RTF.. When you click Save, you will see that the application is contacting the OneDrive SharePoint server, and uploading the file.. Save Files Created in Office 2016 for Mac to OneDrive If you have created a new file offline in Office 2016, when you want to save a file (File > Save or Save As, or ctrl-S) the application will present you with two options: • OneDrive – Northeastern University • SharePoint – Northeastern University (this is the Northeastern instance and is not connected to Office 365 – ITS does not recommend attempting to use this) NOTE: The “On my Mac” option is separate, and will bring you to a different window to choose a folder on your computer to save the file.
